Concrete Paving Association of Minnesota

The Concrete Paving Association of Minnesota was formed on March 11, 1959.

The primary purpose of the Association is to promote the use of Portland cement concrete construction in Minnesota highways, streets, airfields and other paved facilities. An additional goal is to assist in the improvement and technical advancement of the concrete paving industry.

These objectives are to be accomplished by:

- 1) Developing and maintaining constructive relationships with the state and local governmental bodies that are responsible for Minnesota highway networks;
- 2) Serving as a technical resource for pavement designers, managers and owners in order to provide assistance in any stage of the pavement selection, design, construction and maintenance processes; and
- 3) Establishing among members the highest standards for workmanship and pride in concrete pavement construction.

Members of the Concrete Paving Association of Minnesota include:

- Concrete pavement construction and rehabilitation contractors
- Traffic control contractors
- Manufacturers and suppliers of construction materials, including:
 - ◆ Cement
 - ◆ Aggregate
 - ◆ Ready-mix concrete
 - ◆ Chemical and mineral admixtures
 - ◆ Reinforcing materials
 - ◆ Other items
- Manufacturers and suppliers of construction equipment
- Consulting engineers
- Associate members in related fields

Our members are dedicated to the goals and objectives described above and strive to provide concrete pavement-related products and services that are of the highest quality.
