

Concrete Pavement Design Webinars

presented in cooperation with the
Concrete Paving Association of MN
Aggregate/Ready Mix Association of MN

A Series of Four Webinars Addressing Local Concrete Pavement Design Strategies

The Resource for Designing Concrete Streets +

September 28, 2021 - 12 Noon Central

REGISTER

Several years ago, the concrete industry introduced PavementDesigner.org, a multifaceted tool for design of concrete pavements. MnDOT has approved PavementDesigner.org for use by cities and counties. Learn how you can employ this proven technology to address your local street needs.

Optimizing Designs for Concrete Intersections and Roundabouts

October 14, 2021 - 12 Noon Central

REGISTER

Have you noticed the growing utilization of concrete for intersections and roundabouts built to last? This presentation will provide understanding of key design fundamentals. Special emphasis on joint design layout will simplify your future plans.

Designing Concrete Overlays/Extending the Life of Existing Pavements

October 26, 2021 - 12 Noon Central

REGISTER

Today's pavement preservation and resurfacing needs can be economically addressed with proven concrete overlay technology built and tested in Minnesota. Add this strategy to your pavement management toolbox.

Concrete Pavement Designs for Parking Lots

November 11, 2021 - 12 Noon Central

REGISTER

If you are interested in an economical, long term investment, a concrete parking lot may be the answer. Two widely accepted design philosophies for both commercial and industrial facilities will be discussed and success stories will be shared.

*****Note that a separate registration is needed for each one-hour webinar.*****
